SUMMARY

Final-year B.Tech Computer Science student with hands-on **full-stack development** experience in **React**, **Node.js**, and **REST API** design. Built a real-time communication platform and a custom compiler pipeline, and independently delivered a production **Shopify** storefront for a paying client.

EXPERIENCE

Full Stack Developer — Kesav Diamond

Mar 2026 – May 2026

Shopify E-commerce Storefront (Freelance) — Dehradun / Remote

- Designed and developed a responsive Shopify storefront for a luxury jewelry brand, configuring a custom theme, product catalogue, and brand-aligned UI
- Integrated a payment gateway and configured shipping and tax settings, streamlining the end-to-end checkout experience
- Delivered the project independently across a 3-month engagement, from requirements gathering to go-live, working directly with the client to meet functional and design expectations

EDUCATION

B.Tech in Computer Science — Graphic Era University, Dehradun

Aug 2023 – Jul 2027

GPA: 8.5 / 10

SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, C, C++, PHP

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend & Databases: Node.js, Express.js, RESTful APIs, JSON, MongoDB, MySQL

Tools & Platforms: Git, GitHub, Vite, VS Code, Netlify, Railway, CI/CD (GitHub Actions)

Concepts: Data Structures, Algorithms, OOP, System Design

PROJECTS

TalkSpace

[GitHub](#) | [Live Demo](#)

React 19, Node.js, Express, MongoDB, Stream SDK, JWT, PWA

- Delivered a full-stack real-time communication platform live on Railway with 13+ **REST API** endpoints, supporting instant messaging, video calls, and a friend-request system
- Implemented **JWT** authentication with bcrypt password hashing and built a PWA using **Zustand** and **TanStack Query**, backed by a **CI/CD** pipeline via **GitHub Actions**

GravLang

[GitHub](#)

Python, Compiler Design, Lexer, Parser, AST, Interpreter

- Built an interpreted programming language from scratch in Python, designing a full compiler pipeline (lexer, recursive-descent parser, AST, tree-walking interpreter) with OOP and recursion support
- Shipped a custom GUI IDE and CLI alongside a native standard library with 10+ built-in functions, applying strong system design and problem-solving skills

Public Utility Management System

[GitHub](#)

PHP, MySQL, HTML, CSS, JavaScript

- Developed a full-stack PHP/MySQL web application for billing and payment management across electricity and water utilities
- Designed a normalized relational database schema with 6+ interlinked tables supporting account management and bill generation

CERTIFICATIONS

AWS Cloud Practitioner Essentials — Amazon Web Services, April 2026 | Generative AI: Introduction and Applications — IBM, November 2025

Fundamentals of UI/UX Design — Microsoft, May 2025 | Claude 101 — Certificate of Completion
