PROFESSIONAL SUMMARY

3rd-year B.Tech CSE student at Graphic Era University who has built a custom interpreted programming language (GravLang) from scratch and shipped a full-stack real-time platform (TalkSpace) with live deployment. Proficient in data structures, algorithms, OOP, and REST API development across the MERN stack, TypeScript, and PHP/MySQL. Actively seeking internship opportunities to contribute to production engineering teams.

EDUCATION

Year	Degree / Exam	Institute	Score
Aug 2023 – Present	B.Tech in Computer Science	Graphic Era University, Dehradun	8.5/10
2023	Class XII – C.B.S.E	The Millennium School, Meerut	80.00%
2021	Class X – C.B.S.E	The Millennium School, Meerut	80.00%

TECHNICAL SKILLS

Frontend: React, TypeScript, HTML, CSS, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, PHP, REST API Development

Languages: C, C++, Java, Python, JavaScript

Concepts: Data Structures, Algorithms, OOP

Tools: Git, GitHub, Vite, VS Code, Netlify

CERTIFICATIONS

AWS Cloud Practitioner Essentials — Amazon Web Services | April 2026

Generative AI: Introduction and Applications — IBM | November 2025

Fundamentals of UI/UX Design — Microsoft | May 2025

EXPERIENCE

Freelance Web Developer

Mar 2026 – May 2026

Kesav Jeweler's — Shopify E-commerce Website

- Designed and developed a fully functional e-commerce storefront for Kesav Jeweler's on Shopify, including custom theme configuration, product catalogue setup, and brand-aligned UI styling.
- Integrated payment gateway, configured shipping & tax settings, and set up collection pages to streamline the end-to-end customer shopping experience.
- Delivered the project independently from requirements gathering to go-live, communicating directly with the client to meet design and functional expectations.

PROJECTS

TalkSpace | 2025 | [GitHub](#) | [Live Demo](#)

Stack: React 19, Node.js, Express, MongoDB, Stream SDK, JWT, PWA

- Built a full-stack real-time communication platform with instant messaging, video calls, and a friend request system — deployed live on Railway with 13+ REST API endpoints.
- Implemented JWT authentication with bcrypt password hashing, protected API routes, and session management across the full MERN stack using OOP design principles.
- Engineered a PWA with Zustand global state, TanStack Query, and a CI/CD pipeline via GitHub Actions for automated deployment.

GravLang | 2025 | [GitHub](#)

Stack: Python, Compiler Design, Lexer, Parser, AST, Interpreter

- Developed an interpreted programming language from scratch in Python supporting dynamic typing, first-class functions, recursion, and OOP.
- Built a complete compiler pipeline — Lexer for tokenization, recursive-descent Parser generating an Abstract Syntax Tree, and a tree-walking Interpreter with scoped Environment management.
- Shipped a built-in GUI IDE alongside a headless CLI, plus a native standard library with 10+ array and type-casting built-ins.

Public Utility Management System | Aug – Nov 2025 | [GitHub](#)

Stack: PHP, MySQL, HTML, CSS, JavaScript

- Developed a full-stack PHP-MySQL web application for billing and payment management across electricity and water utilities.
- Designed a normalized relational database schema with 6+ interlinked tables supporting account management, bill generation.
