PROFESSIONAL SUMMARY

3rd-year B.Tech CSE student at Graphic Era University who has built a custom interpreted programming language (GravLang) from scratch and shipped a full-stack real-time chat platform (TalkSpace) with live deployment. Proficient across the MERN stack, TypeScript, and PHP/MySQL. Actively seeking internship opportunities to contribute to production engineering teams.

EDUCATION

Year	Degree / Exam	Institute	Score
Aug 2023 – Present	B.Tech in Computer Science	Graphic Era University, Dehradun	8.5/10
2023	Class XII – C.B.S.E	The Millennium School, Meerut	80.00%
2021	Class X – C.B.S.E	The Millennium School, Meerut	80.00%

TECHNICAL SKILLS

Frontend: React, TypeScript, HTML, CSS, Bootstrap, Tailwind CSS **Backend:** Node.js, Express.js, PHP, REST APIs
Databases: MongoDB, MySQL **Languages:** C, C++, Java, Python, JavaScript
Tools: Git, GitHub, Vite, VS Code, Netlify, Railway

PROJECTS

TalkSpace | 2025 | [GitHub](#) | [Live Demo](#)

Stack: React 19 · Node.js · Express · MongoDB · Stream SDK · JWT · PWA

- Built a full-stack real-time communication platform with instant messaging, one-on-one video calls, and a friend request system — deployed live on Railway.
- Implemented JWT-based authentication with bcrypt password hashing, protected REST API routes, and session management across 13+ API endpoints.
- Integrated Stream Chat and Stream Video React SDKs for scalable, production-grade chat and video call infrastructure.
- Engineered a PWA with mobile-first design, Zustand global state, TanStack Query for server state, and CI/CD pipeline via GitHub Actions.

GravLang | 2025 | [GitHub](#)

Stack: Python · Compiler Design · Lexer · Parser · AST · Interpreter

- Designed and implemented a fully functional interpreted programming language from scratch in Python, supporting dynamic typing, first-class functions, recursion, and OOP (classes, inheritance, constructors).
- Built a complete compiler pipeline: Lexer for tokenization, recursive-descent Parser generating an Abstract Syntax Tree (ast_nodes.py), and a tree-walking Interpreter with scoped Environment management.
- Shipped a built-in GUI IDE (gui.py) alongside headless CLI execution, plus a native standard library with array manipulation and type-casting built-ins.

Public Utility Management System | Aug – Nov 2025 | [GitHub](#)

Stack: PHP · MySQL · HTML · CSS · JavaScript

- Developed a full-stack PHP-MySQL web application to streamline billing, payments, and data management for electricity and water utilities.
- Designed a normalized relational database schema with multiple interlinked tables supporting account management, bill generation, and payment processing end-to-end.
