SUMMARY

Final-year B.Tech Computer Science student (Batch 2027) and full-stack developer working in JavaScript and Python. Shipped a production Shopify storefront for a luxury jewellery brand as sole developer, a real-time MERN platform (React, Node.js, Express, MongoDB), and Python backends on FastAPI. Two paid engineering roles and two web-development internships. Seeking a remote Software Engineer internship building full-stack and e-commerce products.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, Java, C, C++, PHP
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Zustand, TanStack Query
Backend: Node.js, Express.js, FastAPI (Python), REST APIs, JWT Authentication, WebRTC
Databases: MongoDB, PostgreSQL, MySQL, Supabase, pgvector (vector search)
E-commerce: Shopify (Liquid theme development, payment gateway, shipping and tax configuration)
Tools & Platforms: Git, GitHub, GitHub Actions (CI/CD), Docker, Vite, VS Code, Netlify, Render, Railway, Vercel
Core CS: Data Structures, Algorithms, Object-Oriented Programming, Compiler Design, DBMS

EXPERIENCE

Full Stack Developer (Shopify E-commerce), Kesav Diamond **Mar 2026 - May 2026**
Freelance | Dehradun / Remote
- Shipped a production Shopify storefront for a luxury jewellery brand to live customers in 12 weeks as sole developer, with a custom theme in Liquid, JavaScript and CSS
- Restructured 40+ product and collection pages, cutting the path from landing page to product detail from 4 taps to 2
- Configured payment gateway, shipping and tax for checkout; responsive UI across 4 breakpoints, QA'd on 8 device classes

Web Development Intern, Prodigy InfoTech **Jul 2026 - Aug 2026**
Internship | Dehradun
- Shipped 5 web applications in 45 days, each scoped, built and deployed to a fixed deadline; completed with outstanding remarks
- Built SkyPulse, a weather dashboard on the OpenWeatherMap REST API with 8 live metrics, a 5-day forecast and geolocation search
- Engineered a minimax AI opponent for NexTTT across 3 difficulty tiers; kept API keys browser-scoped and out of the repo

Frontend Web Development Instructor, Blaze Forge **Jul 2026 - Present**
Freelance | Dehradun
- Teach HTML, CSS and JavaScript to 4 beginners across 2 cohorts, with 90% shipping a deployed, responsive site by end of cohort
- Authored 100 lesson modules with live-coded walkthroughs and run weekly debugging clinics resolving learner bugs in real time

Web Development Intern, Corizo Edutech (Remote) **Jun 2026 - Jul 2026**
- Delivered assigned HTML, CSS and JavaScript builds to deadline in a one-month, project-driven internship

PROJECTS

TalkSpace — Real-Time Chat & Video Platform (MERN) **Live on Render**
React 19, Node.js, Express.js, MongoDB, WebRTC, Stream SDK, JWT, PWA
- Delivered real-time chat and 1:1 video on a Node.js/Express + MongoDB REST API; Stream tokens minted server-side per user
- Secured auth with JWT in an httpOnly cookie, bcrypt and rate-limited login; client state on TanStack Query and Zustand

CIPHER — Multi-Persona AI Assistant with Long-Term Memory **Python backend**
Python, FastAPI, Next.js, PostgreSQL, pgvector, Supabase, RAG
- Built a FastAPI backend for three switchable personas sharing one long-term memory, with pgvector retrieving prior context
- Added document-grounded RAG and text-plus-voice interaction on a Next.js client; async test suite runs with no live credentials

GravLang — Interpreted Programming Language **Python**
Python, Lexer, Recursive-Descent Parser, AST, Interpreter, GitHub Actions
- Built an interpreted language in Python: lexer, recursive-descent parser, AST, tree-walking interpreter, OOP and recursion
- Shipped a GUI IDE with step-through debugger and a CLI; 285 passing tests, and GitHub Actions builds release executables

Playdex — Multi-Store Game Library (Desktop) **Microsoft Store · v1.3**
Electron, Node.js, JavaScript, SQLite, IPC, GitHub Actions
- Built an Electron app merging Steam, Epic and GOG into one library, ending the launcher-by-launcher hunt for a game
- Parsed each store's local files (VDF, manifests, SQLite) read-only; flags games owned twice and per-drive disk use

RepoScope — GitHub & CSV Analytics (PHP, no framework) **Live on Render**
PHP 8.5, JavaScript, HTML5 Canvas, GitHub REST API, Docker, GitHub Actions
- Built a framework-free, database-free PHP app that turns GitHub profiles and CSV files into statistics and charts, using a dependency-free canvas chart library written from scratch
- Added GitHub API pagination with session caching and rate-limit handling, CSRF and CSP protection, and a Docker deploy with CI running 35 regression checks on every push

EDUCATION

B.Tech, Computer Science — Graphic Era Hill University, Dehradun | CGPA: 8.5 / 10 **Aug 2023 - Jul 2027**

CERTIFICATIONS
