SUMMARY

Final-year B.Tech Computer Science student and full-stack developer with two paid engineering roles and six shipped projects. Built an interpreted programming language from scratch in Python (lexer through tree-walking interpreter) and an AI assistant with vector-search long-term memory. Strong across React, Next.js, Node.js, FastAPI and PostgreSQL. Seeking SWE internship or entry-level roles.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C, C++, PHP, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Zustand, TanStack Query

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, WebRTC

Databases: PostgreSQL, MongoDB, MySQL, Supabase, pgvector (vector search)

Tools & Platforms: Git, GitHub, GitHub Actions (CI/CD), Vite, VS Code, Netlify, Railway, Vercel

Core CS: Data Structures, Algorithms, Object-Oriented Programming, Compiler Design, DBMS

EXPERIENCE

Full Stack Developer, Kesav Diamond

Mar 2026 - May 2026

Freelance | Dehradun / Remote

- Shipped a production Shopify storefront for a luxury jewellery brand to live customers in 12 weeks as sole developer, end to end
- Restructured 40+ product and collection pages, cutting the path from landing page to product detail from 4 taps to 2
- Delivered responsive UI across 4 breakpoints, QA'd on 8 device classes, and configured payment gateway, shipping and tax for checkout

Frontend Web Development Instructor, Blaze Forge

Jul 2026 - Present

Freelance | Dehradun

- Taught HTML, CSS and JavaScript to 4 beginners across 2 cohorts, with 90% shipping a deployed, responsive site by end of cohort
- Authored 100 lesson modules with live-coded walkthroughs and ran weekly debugging clinics resolving learner bugs in real time

Web Development Intern, Prodigy InfoTech

Jul 2026 - Aug 2026

Internship | Dehradun

- Shipped 5 web applications in 45 days, each scoped, built and deployed to a fixed deadline; completed with outstanding remarks (PIT/JUL26/20043)
- Built SkyPulse, a weather dashboard on the OpenWeatherMap REST API surfacing 8 live metrics and a 5-day forecast, with city and geolocation search
- Engineered a minimax AI opponent for NexTTT across 3 difficulty tiers; scoped API keys to the browser only, keeping credentials out of the repo

Web Development Intern, Corizo Edutech (Remote)

Jun 2026 - Jul 2026

- Delivered assigned HTML, CSS and JavaScript builds to deadline in a one-month, project-driven internship

PROJECTS

CIPHER — AI Assistant with Long-Term Memory

Next.js, FastAPI, PostgreSQL, pgvector, Supabase, Python

- Engineered long-term memory using vector similarity search (pgvector on Supabase), retrieving relevant prior context per query
- Moved fact-extraction off the request path for zero added reply latency, and wrote an async test suite that runs with no live credentials

GravLang — Interpreted Programming Language

Python, Compiler Design, Lexer, Parser, AST, Interpreter

- Built an interpreted language from scratch in Python — lexer, recursive-descent parser, AST and tree-walking interpreter — with OOP and recursion
- Shipped a GUI IDE with step-through debugger, a CLI and a 10+ function standard library, with GitHub Actions auto-building release executables

TalkSpace — Real-Time Chat & Video Platform

React 19, Node.js, Express, MongoDB, WebRTC, Stream SDK, JWT, PWA

- Delivered a real-time messaging and 1:1 video platform live on Railway across 13+ REST endpoints, covering chat, video calls and friend requests
- Secured auth with JWT and bcrypt hashing; rebuilt client state on TanStack Query and Zustand to keep the live layer in sync

EDUCATION

B.Tech, Computer Science — Graphic Era Hill University, Dehradun | CGPA: 8.5 / 10

Aug 2023 - Jul 2027

CERTIFICATIONS

Generative AI: Introduction and Applications — IBM (Nov 2025) | Fundamentals of UI/UX Design — Microsoft (May 2025)

AWS Cloud Practitioner Essentials (course) — Amazon Web Services (Apr 2026) | Claude 101 — Anthropic
